PROFESSIONAL SUMMARY

Backend Developer with 3+ years of hands-on experience designing and delivering production-grade microservices and RESTful APIs using Java, Spring Boot, and Spring Security. Proven track record in building high-throughput, scalable backend systems for enterprise clients including NSE (National Stock Exchange). Experienced in end-to-end backend ownership — from architecture design and database modeling to deployment and client collaboration. Adept at migrating legacy codebases, optimizing performance, and delivering under Agile sprints. Seeking a Backend / Java Developer role where technical depth and ownership mindset can drive measurable business impact.

TECHNICAL SKILLS

Languages: Java (Primary), SQL, Basic Python

Frameworks & Libraries: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs

Databases: MySQL, Oracle DB, Firebase Firestore

Cloud & Storage: AWS S3 (object storage, large-scale file management)

Tools & Platforms: Git, Postman, IntelliJ IDEA, Tomcat, Maven

Architecture: Microservices, RESTful API Design, Modular System Design

Mobile (Secondary): Flutter, Firebase integration

Methodologies: Agile / Scrum, SDLC, Client Collaboration

PROFESSIONAL EXPERIENCE

Orange League Venture Technology — Client: NSE (National Stock Exchange)

Sep 2024 – Present

Software Developer | ~1 year 9 months

- Engineered scalable backend microservices in Java Spring Boot and Hibernate for NSE's enterprise systems, supporting high-concurrency financial data operations.
- Designed and developed 5+ independent microservices, improving modularity, reducing inter-service coupling, and enabling independent deployability.
- Built a large-scale document management system using AWS S3 for secure, high-volume file storage and retrieval, handling thousands of documents per day.
- Designed and optimized complex SQL queries and database schemas in Oracle/MySQL to support real-time data processing needs.
- Collaborated directly with NSE client teams to gather requirements, define API contracts, and deliver tailored software solutions on schedule.
- Participated in Agile sprint planning, code reviews, and cross-team technical discussions to ensure high code quality and on-time delivery.

Acuradyne Medical Systems Pvt. Ltd (IIT Bombay Campus, Mumbai)

Mar 2024 – Sep 2024

Software Development Intern | 6 months

- Developed and integrated Flutter mobile applications with Firebase backend, enabling real-time data sync for medical use cases.
- Introduced new features and bug fixes across existing mobile application modules, improving stability and user experience.
- Worked on backend components in Java Spring Boot to support mobile API requirements.
- Migrated Python-based application logic to Java, improving execution efficiency and long-term maintainability.

Freelance Software Developer

Oct 2023 – Mar 2024

Independent Contractor (Java Backend & Mobile) | 6 months

- Delivered task-based freelance software projects involving Java backend development and mobile feature enhancements for multiple clients.
- Managed end-to-end project delivery independently — from requirement gathering to deployment — building strong client communication and self-management skills.

Konkan Railway Corporation Ltd

Jan 2022 – Aug 2023

Station Master (Non-Technical Interim Role) | 1 year 8 months

- Managed station operations ensuring safety and punctuality. (Career transition period — returned to software development in 2023.)

Mercurius IT

Jul 2021 – Jan 2022

D-365 CRM Technical Developer | 6 months

- Built SharePoint and Microsoft Power Apps solutions for business process automation, reducing manual workflows for enterprise clients.
- Resolved client-reported issues through root-cause analysis and targeted solution implementation, maintaining high client satisfaction.

Atulsia Technology

Dec 2020 – Jun 2021

Java Intern | 7 months

- Developed and maintained Selenium automation scripts for regression and API testing across multiple web applications.
- Collaborated with QA team to identify defects early, contributing to faster release cycles.

Konkan Railway Corporation Ltd

May 2016 – Jun 2016

Java Intern | 1 month

- Designed and developed a medical assistance application for train passengers as part of a short-term internship project.

EDUCATION

Ramrao Adik Institute of Technology, Nerul — Mumbai University

2020

Bachelor of Engineering, Computer Engineering | CGPA: 6.77
